

CINEMATIZE[®] 2

Select. Extract. Save. The DVD Movie Clip Extractor.

With Cinematize 2, you can now select a favorite video or audio clip from your DVD, and then extract and save it in a format compatible with popular multimedia applications. Follow 3 easy steps and create your masterpiece using your existing DVDs.

Step 1: Select the clip to extract from your DVD

- Select clips as short as a few frames within a chapter or as long as all the chapters in a movie
- Select any point within a chapter as the start point and any point within the same or a different chapter as the end point
- Select video tracks in any DVD format, PAL or NTSC, MPEG-1 or MPEG-2
- Select audio tracks in any DVD format: PCM, AC-3, MPEG, DTS, or SDDS
- Preview in full motion video
- Select from any DVD*, even complex ones with multiple angles and soundtracks

* Extract from any unencrypted DVD, including DVD content decrypted by popular ripping utilities and drivers. USE OF THIS SOFTWARE TO EXTRACT DVD CONTENT MAY REQUIRE THE PERMISSION OF THE COPYRIGHT OWNER.

Step 2: Select extraction options for video, audio, and subtitles

- Extract audio alone, video alone, or together as an MPEG-2 or QuickTime movie
- Decode video to any codec supported by QuickTime
- Powerfully control the video decoding process from aspect ratio to output quality
- Decode AC-3 and PCM audio to AIFF, WAV, or QuickTime formats
- Extract MPEG, DTS, and SDDS audio to MPEG-2 program or elementary stream formats
- Completely control decoding and output formats
- Extract with all original audio and video settings for maximum quality
- Save the extracted clips in formats compatible with popular applications including QuickTime, iMovie, Final Cut, Windows Movie Maker, Adobe Premiere, PowerPoint, even your iPod

Step 3: Extract and save the selected clip

- Extract with active audio/video synchronization using DVD timing information
- Extract and decode video and audio at high speed with multi-threading
- Save multiple chapters as a single clip or multiple clips to automate your job (batch extraction)
- Save QuickTime movies (as flattened single files or with separate audio/video files), AVI files, DV Stream files, iPod Video files, MPEG-4 files, or raw formats
- Extract with acceleration on both G4/G5 PowerPC processors (Mac) and Intel-compatible processors supporting MMX and SSE2 (Mac and Windows)

Cinematize Applications

- Best-of video and music CDs
- Edited recorded TV programs
- Multimedia presentations
- Custom still pictures
- Original video and music DVDs
- iPod video and audio clips
- Multimedia portfolios
- Multimedia Web content
